

# Changelog

Project: Caren, **Nedap**

Group number: **2**

Period: 16 - 26 June

Please describe all changes in your project from 16 to 26 June in this changelog document. Export as PDF and add it to a 'documents' folder in your git project.

Keep it short and concise but be specific about what changed. Feel free to resize the feedback text areas.

## DESIGN

### Project Description (project manual 4.1)

*Unchanged.*

### HTML/CSS Mockup (project manual 4.2)

*Added all HTML & CSS mockups.*

### Use Case Diagrams (project manual 4.3)

*Unchanged.*

### Database Design: Class Diagram and schema.sql (project manual 4.3 and 4.4)

*Unchanged. However, we always had one but seems to have been missed since last checked.*

## FUNCTIONAL REQUIREMENTS

### Added or revised functionality

*Ability to change profile pictures..*

### HTML/CSS/JS Frontend

*Changed a lot of things. Messages occur when there are input errors. Search queries are better represented with high lighting.*

### Transactions (project manual 5.9)

*Added transactions to all queries alongside appropriate rolling back when needed.*

### JDBC / Prepared Statements (project manual 5.7)

*Unchanged besides transactions.*

### XML/JSON (project manual 5.5)

*Unchanged.*

<b>Usage of JSP/REST (project manual 5.5)</b>
<i>Unchanged. But all our Rest api was missed somehow last time it was revised.</i>

<b>Testing (project manual 5.2 and 6.2)</b>
<i>Added JUNIT classes. Should be complete by the end of June 27<sup>th</sup>.</i>

<b>Security (project manual 6.3)</b>
<i>Added security across the board. This specially includes hashing of passwords.</i>

## OTHER

<b>Other changes</b>
<i>Readme file was always there but seems to have been missed too.</i>
